- Zero Waste consulting

NEW PRODUCTS

BUNDLE

Our two product lines:
GreenStripe® Renewable & Compostable*
BlueStripe™ Made with Post-Consumer Recycled Content

Product features

GreenStripe - What you need to know:

Made from renewable plant materials that can be grown again and again.

Not made from oil like traditional plastics. All GreenStripe® products (except PSM Cutlery) are compostable, which means they can be returned to the soil to help plants grow.

Compostable GreenStripe® products are ASTM compliant and BPI certified compostable in commercial facilities only, which may not exist in your area. Items have been or are being tested in accordance with EN13432.

Not suitable for backyard composting. These products need the high heat of a commercial pile to break down.

Paper and Sugarcane products can go in the freezer, although they are not airtight, so freshness and freezer burn can become issues if left there for too long. Ingeo™ can become brittle when frozen, so we don't recommend putting these products in the freezer.

BlueStripe - What you need to know:

Made from post-consumer recycled materials that have been used, recycled, and repurposed, meaning fewer virgin resources are required and less landfill waste is created.

Making new products from recycled materials helps drive recycling markets and infrastructure.

Plastic can become brittle when frozen, so we don't recommend putting these products in the freezer.

BlueStripe™ plastic products can't be recycled in most communities, but check with yours to find out what they'll accept.

BlueStripe™ products incorporate the highest amount of post-consumer recycled material available without compromising performance.

BlueStripe™ hot cups are not recyclable.

Material type

What is it?

Why we use it

What we use it for

- Polylactic acid
- Plastic made from starchy plants like corn.

- Looks and feels like traditional plastic, but is compostable in commercial composting facilities
- Want a plastic cup without the petroleum? Here it is.

- Cold Cups
- Hot cup lining
- Hot cup lids
- Cutlery
- Clear containers

- Plant Starch Material - 70% plant materials like corn, and 30% fillers like polypropylene and talc

- Heat tolerant and super durable
- Contains 70% renewable materials (plant starch)

- Cutlery

- Also known as bagasse
- Made from the stalk left over after the cane juice is extracted to make sugar

- Renewable and fast growing
- Bagasse fiber is a byproduct that would otherwise be discarded or burned
- Compostable in commercial facilities

- Plates
- Bowls
- Containers
- Trays

- Mix of bagasse and bamboo fiber

- Renewable and fast growing
- Bagasse fiber is a byproduct that would otherwise be discarded or burned
- Compostable in commercial facilities

- Plates
- Bowls

- Stalk leftover after wheat grains are harvested

- Renewable and fast growing
- Straw is a byproduct that would otherwise be discarded
- Compostable in commercial facilities

- Plates
- Bowls
- Containers

- Used office paper, junk mail and other paper

- Post-consumer paper reduces demand for virgin fiber
- Supports recycling programs

- Hot cups

- Polyethylene terephthalate is commonly used in pop and water bottles

- Post-consumer PET reduced demand for virgin plastic, and therefore petroleum
- Supports recycling programs

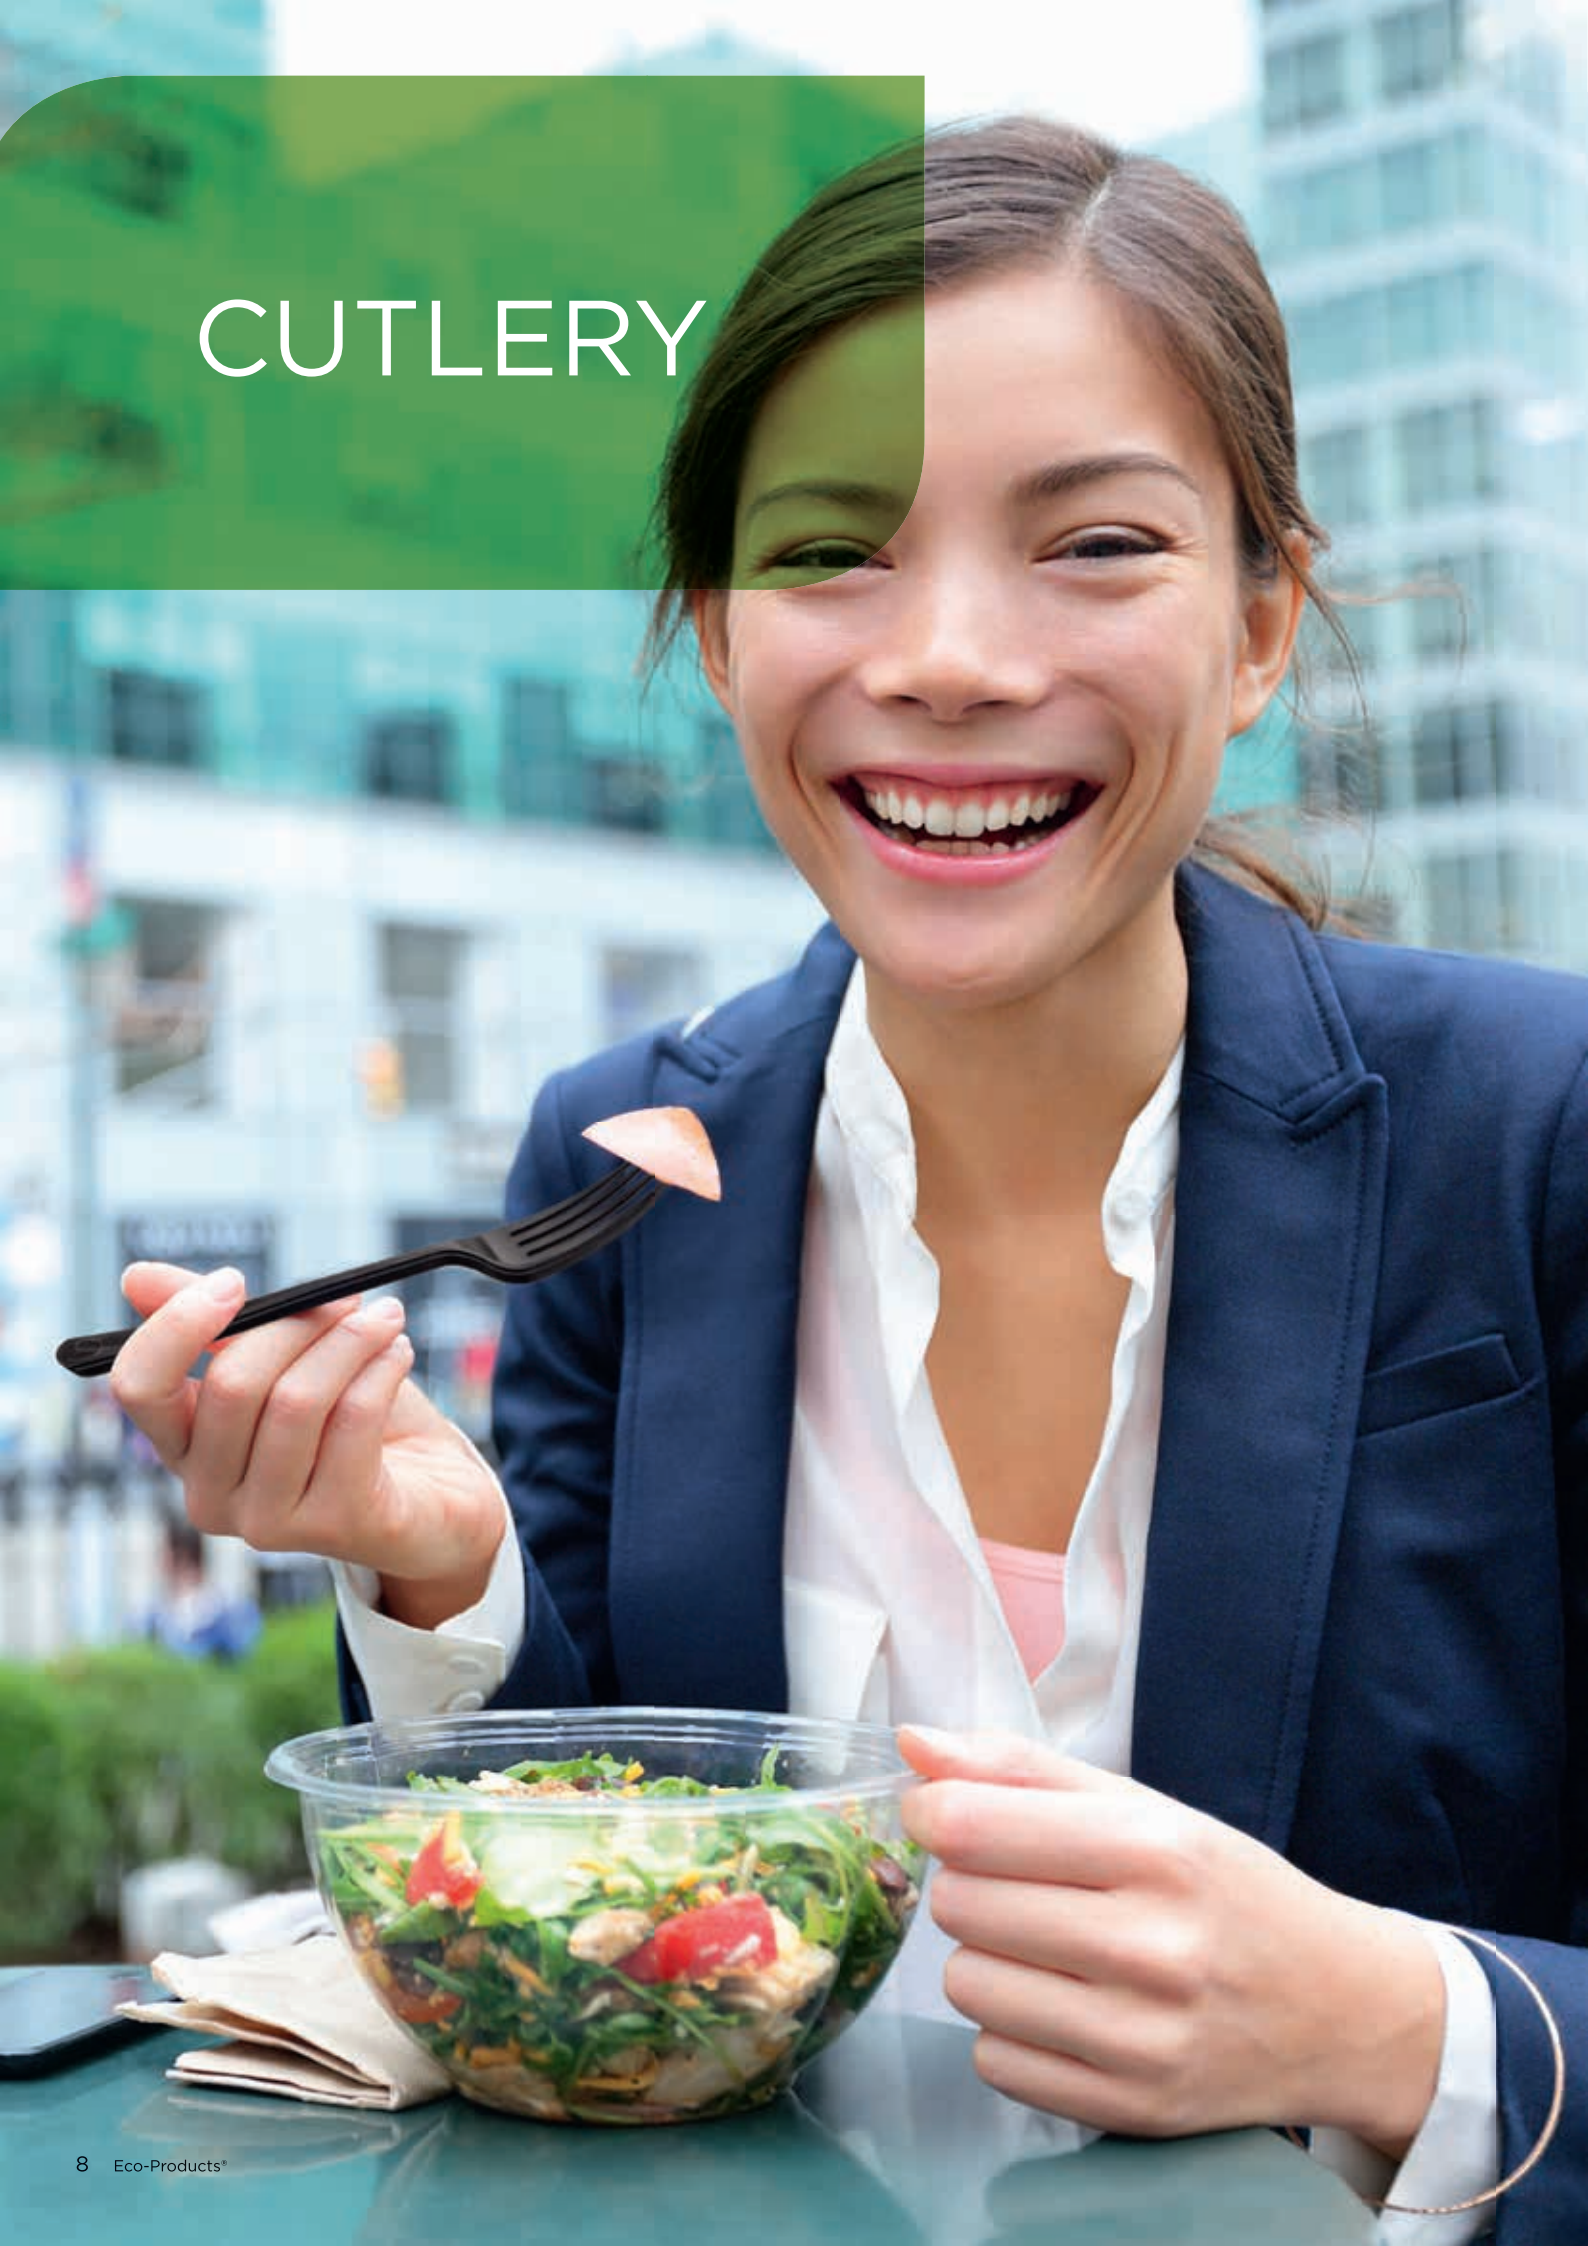

- Cold Cups
- Containers
- Lids for sugarcane bases

- Polystyrene is found in products such as CD cases and plastic hangers

- Post-consumer PET reduced demand for virgin plastic, and therefore petroleum
- Supports recycling programs

- Cutlery
- Hot Cup Lids

CUTLERY

Plantware® High-Heat Cutlery

Renewable & Compostable Plantware® Cutlery are the only choice for compostable cutlery with a high-heat tolerance. Plantware's new formulation offers 95% stronger handles, 20% stronger fork tines, and heat tolerance up to 93°C without relying on unsustainable virgin plastic resources. These utensils are 100% renewable, BPI certified compostable and ASTM D6400 compliant.

DINNERWARE

Sugarcane Plates

Renewable & Compostable Sugarcane Dinnerware is designed to be strong as well as grease and cut resistant. Sturdy and versatile, these plates and cups work well for a wide variety of foods. They're the ideal alternative to traditional plastics or polystyrene, because they're made from reclaimed and rapidly renewable sugarcane fibers. These products are 100% renewable, BPI certified compostable and ASTM D6868 compliant.

FOOD CONTAINERS

Folia™ Sugarcane Take-Out Containers

The patented Folia™ line was designed to completely redefine the take-out and leftover experience. Innovative features include tear-away flaps for easier access to food, leak resistant side flaps that prevent spills and hold condiments and cutlery, and a full array of sizes that satisfy a broad range of needs. These products are 100% renewable, BPI certified compostable and ASTM D6868 compliant.

WorldView™ Take-Out Containers

We've engineered our newest line of take-out containers to combine environmental benefits with top-notch performance. Our WorldView™ Take-Out Containers combine sugarcane bases with clear RPET lids for maximum strength and optimum presentation. The bases are 100% renewable, BPI certified compostable and ASTM D6868 compliant, while the RPET lids are made with 100% post-consumer recycled content.

Renewable & Compostable Straws

Renewable & Compostable Straws are the ideal finishing touch for cold beverages. Made from PLA, a plant-based plastic, these straws go perfectly with our GreenStripe® Cold Cups. 100% renewable, BPI certified compostable and ASTM D6400 compliant.

#	Product code	Product	Size	Qty/case

CUSTOMIZATION

Custom prints are a great way for you to promote your organization, brand or event while also encouraging waste diversion, sustainability, and smart purchasing.

Custom Product Development

Ready to go beyond simple customization? Custom shapes can fulfill your custom packaging and branding needs in ways that even custom printed items just can't. Our experienced design team can help you create a tailor-made product to serve your food with flair without sacrificing functionality.

Custom Print & Emboss

Your food isn't generic, so why should your packaging be? You don't have to use off-the-shelf products that just anyone can use - you can build your brand with custom prints and embossing. With more than 60 customizable products, you can set yourself apart with a customized packaging suite. See page 39/40.

Sugarcane Bowls	EPBL12, EPBL16	-	1 spot
Round Deli Containers			
Round Deli Containers	EPRDP8, EPRDP12, EPRDP16, EPRDP32 (sidewall only)	-	1-4 spot

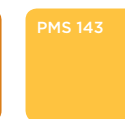

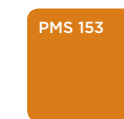

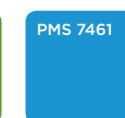

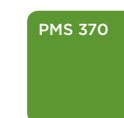

CMYK Color

If the art has gradients, blends, shadows, etc., or if it is made up of many colors like a photo, CMYK is the way to go. Cyan, Magenta, Yellow and Black ink can be combined in different amounts to achieve millions of colors. This is the default method for our paper products because the minimums are lower and it is faster and less expensive.

Spot Color

If the cup design has just a few solid colors, using spot color is the simplest way to go. Colors match better because the vendors use a specific color of ink rather than blending inks to build the colors. This is the only option when printing on our sugarcane or clear PLA products.

Custom Emboss

Product	Code/Sizes	Tool Type
Clear Containers & Lids		
Deli & Portion Cup Lids	EPRDP5LID, EPRDPLID, EPPCLID	Insert

** Any custom-embossed WorldView™ item can be produced in White or Natural, even if we do not currently stock it in Natural.

Emboss or Deboss ?

Embossing and debossing are similar processes. Embossed designs appear raised from their surroundings, while debossed designs are just the opposite and are pressed down into the material.

In profile. Design is raised.

In profile. Design is indented.

SERVICES

All of our services are “Included in the Box”. In other words: complimentary. Gratis. On the house. No strings attached. If you are an Eco-Products customer, we’d love to help you spread the word about your sustainability mission.

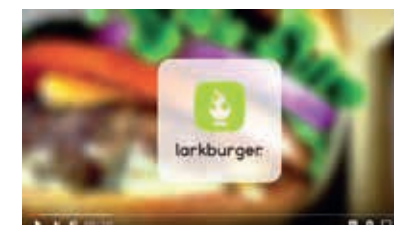

Marketing Support

Our design team can make a custom piece featuring your product selection, logos and graphics to make something that solves your unique communication challenges.

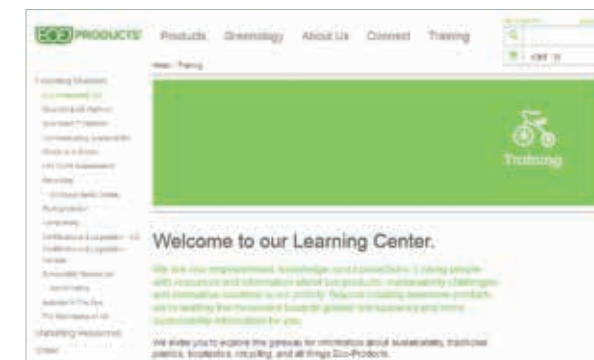

Video Production

In the age of the viral video, there's no denying that video is a powerful communication tool. We can help you harness that power. Our in-house team can shoot, process, edit and publish your video project. Whether it's a case study to publicize your sustainability efforts or a training video for your employees, let us help. Check out our past projects on our YouTube channel: youtube.com/user/greenisallwedo.

Training

We know sustainable disposables sound like an oxymoron, and there's A LOT of information to take in if you are just getting to know us. We've created a bunch of interactive training modules and videos to help you learn more about us, our products and sustainability topics in general. Not to mention the Greenology section of our website, FAQs and download library! We also have our very own Sustainability Maven so if you ever have a question, contact us at: ec.info@novolex.com

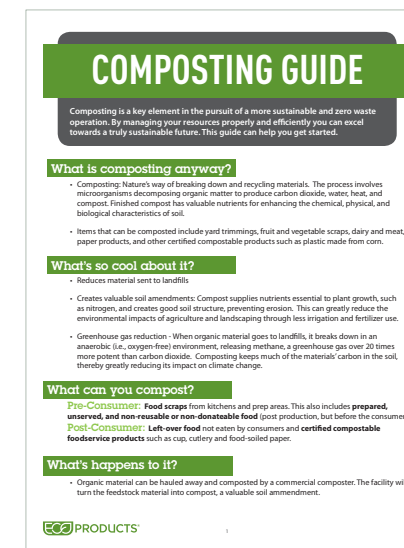

Custom Life-Cycle Assessment

Want to know the carbon footprint of your Eco-Products? We can generate a report outlining the carbon, energy, and life cycle data for the products you use. Improve your environmental program, track your numbers, and show your customers your commitment to sustainability with a customized Life-Cycle Assessment Report. Contact us at: ec.info@novolex.com

Zero Waste Consulting

If you're interested in waste diversion but starting a composting program or increasing your recycling rates seems daunting, fear not! We've been at this for awhile now. From little coffee shops to huge stadiums, chances are we've seen your situation before and can help you navigate the waters of haulers, composters, best bin practices and the like. Don't go at it alone, we got this. Contact us at: ec.info@novolex.com

Certified

Corporation

Companies who are certified B Corps have been verified by the non-profit organization B Lab to meet the highest standards of social and environmental performance, transparency, and accountability.

So what does this really mean for Eco-Products? It means that we have achieved a new level of third party verification for what we've been telling you all along – that Eco-Products is the genuine article: we practice what we preach, and “Green is all we do” is more than just a tagline. More importantly, it is reflective of our ongoing commitment to sustainable business practices. As those who have read our annual sustainability report know, this has been a certification standard we've measured ourselves against for years and our certification reflects our commitment to these standards going forward.
